

June

	Monday	Tuesday	Wednesday	Thursday
Week 1	Today is your first day of your first full week of summer. Ask your parent to buy you a spiral notebook and on the cover write, My Summer Journal.	Have you ever been camping? Ask your mom and dad if they will take you, then make a list of things you will need to survive in the woods.	Make a tally chart to show the number of doorknobs and keyholes inside and outside your house. Use tally marks.	Create silly sentences using these words: bugspray, carnival, picnic, swing, happy, tired, garden and rollercoaster.
Week 2	Go outside and sit down. Don't talk. Look very carefully at the sights of nature. Lay down and look at the grass carefully, write down all the living creatures that you see, don't forget the tiny ones.	Make a list of things that are yellow. Can you write 10? Can you write 20? How about 50? If you get stumped, ask your siblings or parents to help you.	Next time your family does a load of laundry, and they are hot and fresh from the dryer, sort them in different ways, make up your own sorting rules: color, article, size, etc.	Write a story about a summer picnic, just you and your family, plan the place and the menu. Then ask your parents if they will take you on a picnic.
Week 3	Look through a magazine, cut out letters to make words that are related to summer, like lemonade, parade, bugspray, fireworks, lake, etc.	Think about the word CAN. It's a word that's used in a lot of other words. Write as many words as you can that have the word can in it.	Your favorite Webkinz cost \$12.99. Make a list of all the jobs you could do around your house to earn the money to buy it. Think of at least 10 jobs and then start doing them.	Make a T chart of book titles in your room. Label it: Books I Like to Read & Books I Like to Have Read to Me. Then ask your parent to read those favorites again.
Week 4	Go to the public library and check out some books for your parents to read to you. Ask the librarian if there are any summer reading programs and attend one of them.	Make a venn diagram to compare how a wagon and a bicycle are alike and different. Think of at least 5 ways for each space.	Make homemade ice cream. Go to www.familyfun.com and look up the recipe. Write it down in your journal and then ask your parent to help you make it. Enjoy!	If I ate 5 apples on Monday, 10 on Tuesday and 15 on Wednesday, and I continue this pattern, how many apples will I eat on Friday?

* Don't forget about your Summer Reading Contract *
